

AWIS PREFORM: ASSET IDENTIFICATION. HYDRANTS

WHERE IS THAT HYDRANT?

Fire hydrants exist to protect life and property from the perils of fire.

Certainly they have other uses, but their role in protecting us day in day out is acknowledged as their primary use.

The hydrant has to be located as quickly as possible

**AWIS PREFORM HAS THE SOLUTION
TO THE PROBLEM**

Below ground hydrants are becoming harder and harder to locate. They are hidden or obstructed by top soil plants or trees or have vehicles parked over them

Fire Brigades are finding it harder to locate Fire Hydrants.

When the Appliance arrives on scene they have only 2-3 minutes before they require Mains Water to continue the Fire Fight.

AWIS Preform uses Thermoplastic in a triangular shape to point to the Fire Hydrant. We also supply a Blue Road Pavement Marker (RPM) (Cats Eye) to also identify the hydrant location.

AWIS have been working with Water boards and Fire Departments to develop this system. The system consists of a Triangle 450mm High x 250mm Wide on the road pavement just off the gutter line . A Blue RPM to be placed in the centre of the carriageway.

The Standard has adopted, White as the colour for the Hydrant Triangles but some area's prefer Blue, and New Zealand has adopted Yellow. As we are the manufacturer's we can supply any colour and size you prefer.

FEATURES

- **Approved for use on Road Pavements.**
- **Quick and easy to apply**
- **Withstands temperature extreme**
- **Preform markings can be applied to asphalt, concrete driveways, kerbs, masonry, ceramic tiles and metals.**
- **Non-toxic**
- **Long-lasting skid-resistance**
- **Good resistance to water, motor-oil, detergents, solvent and UV light**
- **Increased retro-reflectivity**
- **Eliminates unnecessary colour changes with the paint machine and associated waste of material**
- **Standard colour, White. Other colours available upon request.**
